## THE COVER FLOWER

### C. Reticulata 'Lila Naff'

This month's cover flower rather sneaked up on camellia people in Southern California. It was originated by Tammia Nursery of Slidell, Louisiana, and as happens frequently in the case of varieties that originate elsewhere, was slow to get started here. The first significant showing of the flower was in the 1969 shows, and on the strength of this showing was given the Frank Storment Award of the Southern California Camellia Society for best new reticulata. The large, semi-double silver pink flower blooms at the time of the other reticulatas.
